

HENRY-GRIFFITTS®

CUSTOM GRIND SERIES

“SIZZLE” MILLED WEDGES

For the first time, a wedge series custom ground for your shot preferences – just like the touring pros.

FEATURES

Custom Grind: Henry-Griffitts custom club makers custom grind the sole of each of your wedges to fit your personal playing style. Each wedge can be ground differently, specific to the types of shots played with that club. Four standard grind options complement your short game – Standard Grind, Tour Grind, Heel Grind and V-Grind. And, for the discriminating player, the premium Hobson Grind perfects each sole via a multi-step fitting/grinding process – personally ground by HG’s club specialist Grant Hobson.

Fly-Cut Faces: The faces of the wedges are treated with a detailed fly-cut machining process that produces a perfectly flat textured surface, allowing for effortless shots.

Sizzle Milled Grooves: Precision machine-engraved grooves conform to meet 2010 USGA groove standards. Proprietary Sizzle Milled process guarantees the maximum groove volume and shape for maximum spin under the toughest conditions.

100% Pure Virgin Steel: Cast with SS431 pure virgin steel. No recycled forks and spoons. Made as pure as the shots they hit.

BENEFITS

- Great feel
- Increased spin
- Superior control
- Classic eye appeal
- Fit to the player’s lie angle
- Added confidence from any lie
- Available in a large selection of shaft types and flexes
